

Figure 1. Measured torque, rotational speed and static thrust against motor current for four carbon-fibre propellers on a single T-MOTOR unit. Symbols are measured points at throttle settings of 50, 55, 60, 65, 75, 85 and 100 %; lines join successive points and are not fits. Static bench test data, manufacturer supplied. The 16x5.4 in. run reached the motor thermal limit at 100 % throttle.
